QUALITY, PRECISION, DURABILITY

At 1st Products, our mission is to professionally market, sell, and distribute quality products and services, create exceptional customer satisfaction, and be the preferred supplier in our industry. In doing so, we will add value to our customers by offering innovative solutions, ensuring consistent product quality, and fostering long-term relationships built on trust and reliability.

VC-40

1st Products introduces a smaller, compact version of the same quality. The VC40 offers tighter blade spacing from and $\frac{1}{2}$ "-2" spacing and an optional thinner blade, makes it the best VERTI-cutter for compact tractors.

VC-60

The VERTI-cutter's patented swing-hitch allows the unit to turn during operation increasing maneuverability and the belt drive with 12" diameter blades provides a faster blade RPM (tip speed) improving quality of cut.

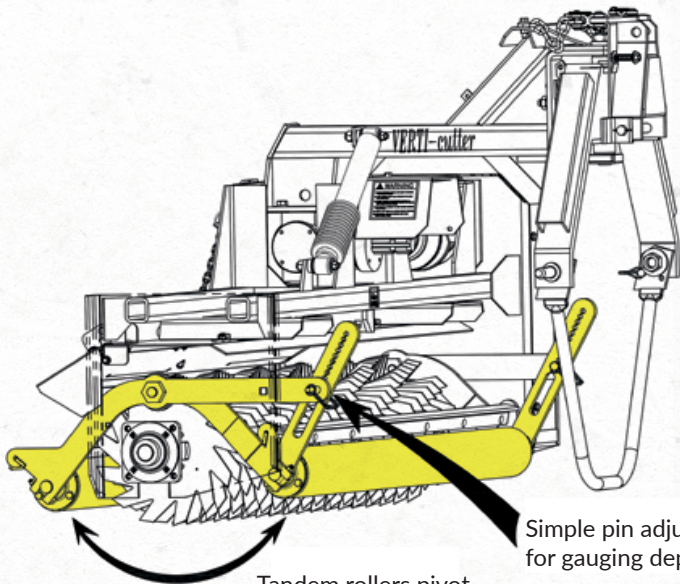

VC-90

Building on our commitment to quality and durability, the VC-90 features an all-welded steel construction and 12" diameter blades, designed for those demanding maximum efficiency and longevity. Ideal for larger tractors, the VC-90 combines size and strength, offering professional-grade cutting for expansive turf areas.

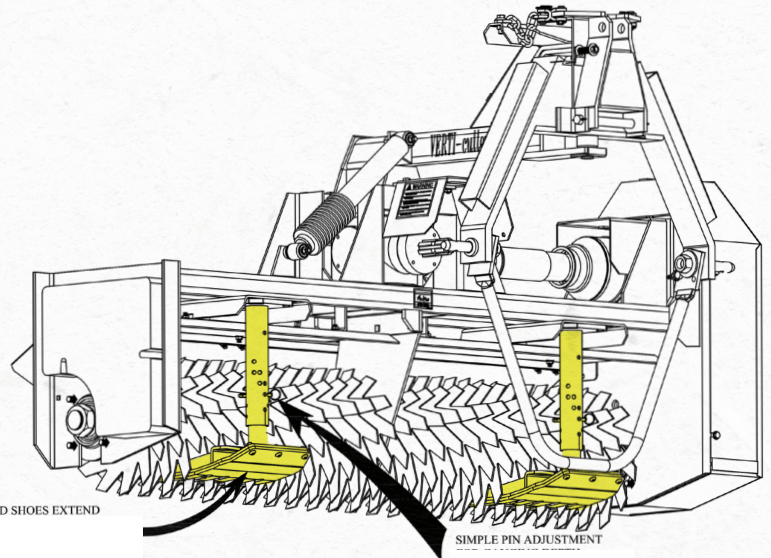

SPECIFICATIONS

Tandem rollers pivot around blades for consistent cutting depth

Simple pin adjustment for gauging depth

SKID SHOES EXTEND

Skid shoes extend between blades for consistent cutting depth over uneven turf

SIMPLE PIN ADJUSTMENT

Simple pin adjustment for gauging depth

VERTI-cutter

First Products introduces a smaller, compact version of the same quality. The VC40 offers tighter blade spacing from and ½"-2" spacing and an optional thinner blade, makes it the best VERTI-cutter for compact tractors.

Double Rollers

The double roller depth gauge system allows consistent depth control over undulations.

Available for VC-40 and VC-60

VC-60

VERTI-cutter

Double Rollers

The double roller depth gauge system allows consistent depth control over undulations.

1 1/2" spacing available now

Available for VC-40 and VC-60

Skids

The depth gauge skids are directly centered under the shaft allowing the skids to float over level surfaces. 2" spacing only.

Not available for VC-40

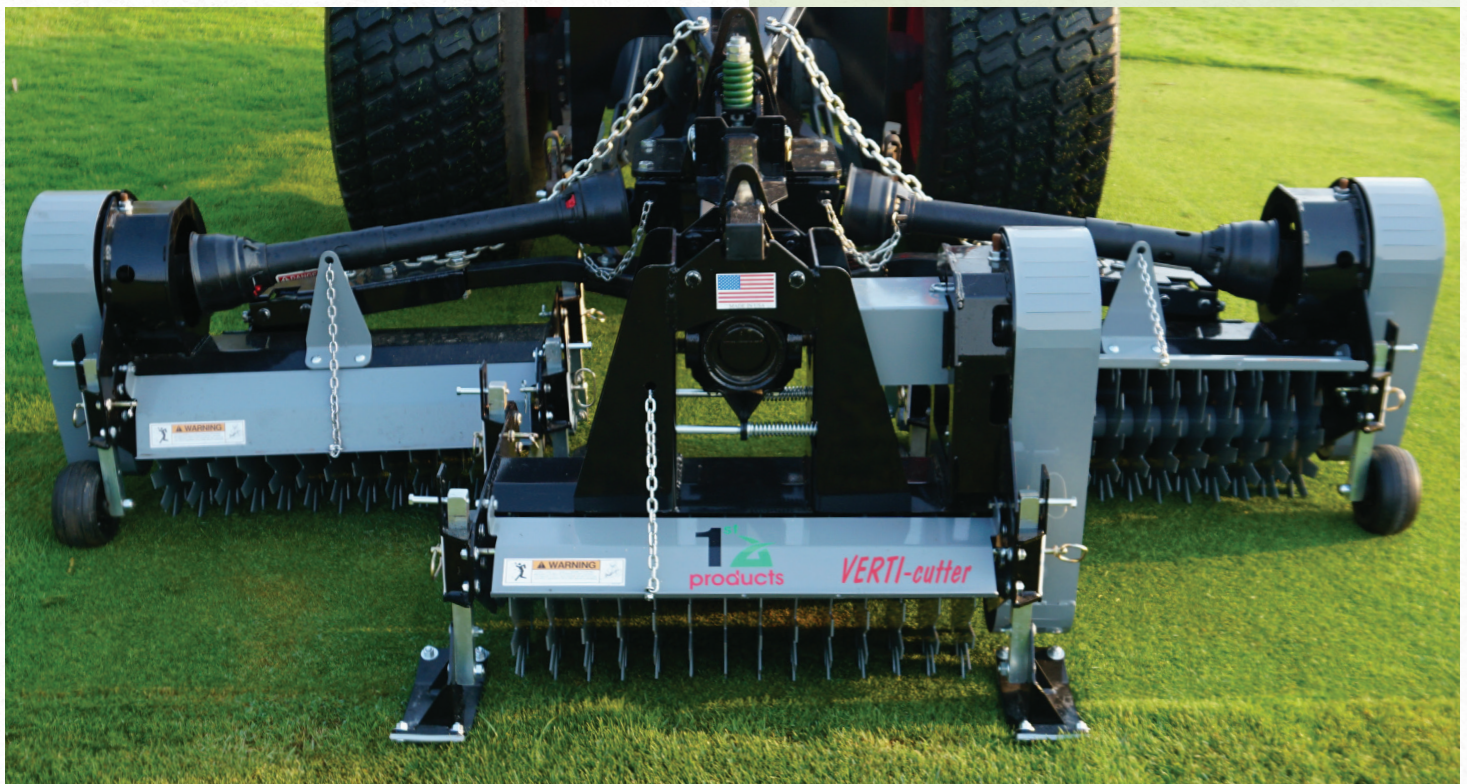

VC-90 VERTI-cutter

Improve your turf's health with the VC-90 VERTI-cutter. Designed for precision, the VC-90 effectively manages thatch and soil compaction, enhancing air, water, and nutrient absorption. Ideal for professionals, it ensures resilient, thriving grass with minimal effort.

- 3 Independent Floating Heads
- Front Roller for Smoother Cut
- Hinged Rear Shield
- Fast Depth Adjustment
- Open Discharge
- Patented Swing Hitch

“At Aeration Technology, verti-cutting is one of the many contracting services we proudly offer across the state of Florida. Each year, we verticut 5,000 acres of fairways, and in that time, we’ve tested nearly every verticutter on the market. Without a doubt, nothing compares to the performance and durability of 1st Products equipment. We currently operate over 12 VC-60s for fairways and tees, along with a few VC-40s for greens, and we’ve recently added our first VC-90 to the fleet. We are extremely impressed—the VC-90 is a tank! It delivers unmatched power, efficiency, and reliability. On top of that, the customer service from 1st Products is second to none. In an era when top-notch service is rare, they consistently go above and beyond to ensure our needs are met. We highly recommend 1st Products for their exceptional equipment and outstanding customer support!”
